

An integrated cell phone solution for your Mercedes-Benz.

- Increased road safety •Enjoy handsfree calling convenience
- Stay legal while using your phone •Easy self installation

With Bluetooth® wireless technology, your phone will be connected to the car with no wires – it will work if the phone is in your pocket, in your briefcase, or even lost in the trunk. Use almost any Bluetooth® compatible phone from the service provider of your choice.

Argos™ is the first and only solution of its kind featuring:
Support of Bluetooth® wireless technology equipped mobile phones with headset or handsfree profile.

Full duplex hands-free communication with digital echo cancellation.

Phonebook Upload, recent call lists, caller-id and voice dial are supported (phone and Head-Unit dependent features).

Microphone mute (an Argos™ exclusive feature).

Supports the use of steering wheel controls and keypad dial from your radio or Command unit.

"Take private" - able to disconnect (and reconnect) phone from vehicle from the Head-Unit.

Fully compatible with Command and Mercedes Benz Voice Activation.

Secure connectivity assured - Pairing **MUST** be initiated via the Head-Unit.

Mercedes-Benz Bluetooth® system

Argos™ for Mercedes-Benz is a fully integrated Bluetooth® solution for many late model Mercedes-Benz vehicles. Featuring

support for standard head units as well as the MB Command system. This simple solution functions similar to a Mercedes-Benz factory telephone system except that it is based on Bluetooth® wireless technology that will allow you to choose from many phones and carriers.

Specifications

Your kit will include the Argos™ module, an owners manual/installation guide, and all necessary cabling (including Fiber Optic if required) based on your vehicle and equipment.

Compatible with Bluetooth 1.2 Spec - Class 2. Range approx 30ft/10m.

Supported profiles: Handsfree, Headset, Object Exchange

FCC ID: SD7GR2320

CE Mark pending

Argos™ is priced FAR less than a Mercedes-Benz factory system and uses your choice of phone and service provider (phone not included).

Argos™ is made in the USA.

INFORMATION AND PURCHASE of an Argos™ unit can be facilitated by visiting our website at www.EuroCarPhone.com

CHECK COMPATIBILITY of your phone and car by visiting our website at www.EuroCarPhone.com

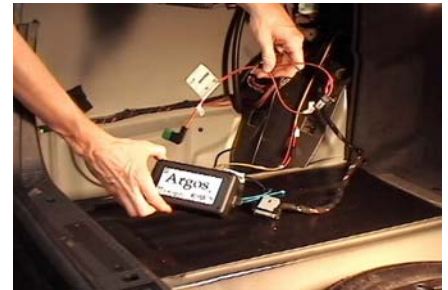

The Bluetooth® word mark and logos are owned by the Bluetooth SIG, Inc. and any use of such marks by ECP is under the manufactures license. Other images, trademarks, and trade names are those of their respective owners..

What is Bluetooth®

Bluetooth® is a wireless technology that allows computers, phones, and other devices (cars included) to talk to each other over short distances (up to about 30ft). Bluetooth® uses radio waves and is designed to be a secure way of connecting two devices without wires.

One of the key benefits to using Bluetooth® wireless technology is that you can use virtually ANY compatible phone and you can swap out your phone anytime you like and not have to change anything in the car. You are no longer tied to a Mercedes-Benz branded phone that is already out-dated.

Installation

Installation of your Argos™ unit is simple!

This single box has only two connectors - one for the Fiber Optic connector and one for a standard 25pin plug.

Once you have found these connectors in your vehicle (usually behind the trunk liner on the left hand side) all you will need to do is plug the unit in and secure it! Rest assured that your product will come with installation information specific to your vehicle.

Once installed, your vehicle will recognize Argos™ as a telephone unit and you will have access to it immediately. No trip to the dealer for configuration or coding is required in most cases.
